

Congressman Marchant:

I wanted to be sure to contact you regarding Nancy Pelosi's attempt to pass the Senate Health Care Reform bill in the House. I believe this will lead to reconciliation in the Senate and, therefore, a government takeover of our health care system in direct violation of the People's will. We deserve better than this.

Please do everything in your power to defeat this bill. It is time to start over. Reform health care in an open, positive, bipartisan way. Prevent a government take over of our health care system and support the individual's right truly to choose their own insurance policy at an affordable cost.

I support Minority Leader, John Boehner's means of accomplishing this objective. Give us the ability to purchase across state lines, (not to be restricted to a government exchange); work for tort reform that will reduce the cost of malpractice insurance for doctors; eliminate pre-existing conditions; prevent insurance companies from arbitrarily raising health care premiums; and for those who cannot afford insurance, I ask you to work toward a program that will provide government vouchers that will help them obtain the quality care they need.

I do not believe we need to establish a government run system in order to bring down costs and reign in insurance companies. Nor is it necessary to reform the entire health care system in order to provide insurance to those who cannot afford it. We understand the answer is complicated. We also understand this bill is full of "political deals" that add to our outrageous deficit and endanger our country's financial future.

I appreciate your listening to the people you represent. Thank you for your kind consideration.

Respectfully,  
Diane W. Collins
